Letter of Commitment

Liberty Consultants is an organization whose purpose is to help children and adults realize their full God-given potential. Currently, Candace Boyle conducts the evaluations and designs the remedial program. After earning her B.A. in Education, Candace received training as a developmentalist and founded Liberty Consultants in 1996.

Liberty Consultants dedicates its time to individuals who are committed to improving their function. As such, Liberty is limited in the number of families it can serve.

Development and neurological organization are ongoing processes. They require hard work as well as a great deal of time and energy. All of Liberty's families have committed their time and energy to ongoing education through the evaluation process.

Your commitment is important to the success in your family...

We, the undersigned, understand the commitment Liberty has made to help individuals realize their fullest, God-given potential. As such...

- ❖ We agree to meet evaluation requirements by traveling tri-annually to a Liberty evaluation site of our choice or accepting an evaluation option when available.
- ❖ We commit to doing our best in using the knowledge gained through the use of the individualized program designed for us.
- ❖ We realize that inconsistency of accomplishing program should not affect an appointment as development is on-going. We will not cancel an appointment for this reason.

If we should break this commitment, we understand the integrity of our program may be affected. Should this occur we realize that Liberty may give our appointment to an awaiting family and that re-scheduling non-emergency appointment cancellations may involve a waiting list.
